

Skyline Studio Drone CV

Skyline Studio has had the pleasure of serving its clients for the past five years. We're a team of passionate creatives and talented operators. Our focus on dynamic drone cinematography has led to numerous projects that we're proud to have been a part of. Skyline Studio is represented by IATSE 667, making us Eastern Canada's top drone choice for Film/TV productions. Skyline Studio operates under an annual, nationwide Special Flight Operations Certificate (SFOC) issued by Transport Canada, which authorizes us to fly in controlled airspace and at night. Each of our UAVs have \$5 million in liability insurance.
